**Abstract.** This chapter details, for the period 1972-2000, the membership of the scientific councils for the *Stellar Data Center (CDS)*, later called *Strasbourg astronomical Data Center*, installed at Strasbourg Observatory.

The *Centre de Données Stellaires (CDS)*, subsequently called *Centre de Données astronomiques de Strasbourg*, has been installed in 1972 at Strasbourg Astronomical Observatory by the decision 1/72/D0 of the French *Institut National d'Astronomie et de Géophysique (INAG)*. See other chapters in this volume (Heck 2005a&b, Jung 2005) for more details.

From the beginning, a scientific council was part of its structures. The by-laws (Art. 4) detail its composition as being made of six French astronomers plus six foreign ones, serving terms in principle of three years. The first council has been set up by INAG Decision 2/72/D0 while the nomination of J. Jung for five years as the first CDS Director resulted from INAG Decision 3/72/D0 dated 31 May 1972. Table 1 gives the composition of the successive councils. It is followed by an alphabetical list.

Other members were subsequently accreted to the CDS councils, such as the CDS Directors or the Observatory Directors (when not designated members), or representatives from organizations such as INAG<sup>1</sup>, the French *Centre National de la Recherche Scientifique (CNRS)* and *Centre National d'Études Spatiales (CNES)*, as well as the *Federation of Astronomical and Geophysical Services (FAGS)*. They are not listed here as those representatives often changed from one meeting to the other.

<sup>1</sup>Later called *Institut National des Sciences de l'Univers (INSU)*.
